Technical Bulletin No. 4

1. Clarification of Art. 7.1 (Fuel tanks) of the TCR Technical Regulations
The tank filler must be shielded by a fireproof and liquid-proof protective device.
All cars using on-board fuel tank filler have to present a fireproof and liquid-proof cover.
This cover has to be certified on the TCR Technical Form and cannot be modified.

2. Due to end of production of Scrutineering Data Logger AIM Evo4 we will accept with immediate effect the Scrutineering Data Logger AIM Evo5 as defined by **memotec**.
Please inform the TCR Technical Delegate in case you are using this system.

3. Clarification of Art. 3.8 (Driver Aids) of the TCR Technical Regulations
Regarding launch control we point out on the Regulations requests:
 - Only one engine rev-limiter is allowed. This rev-limiter value will be communicated to the TCR Technical Delegate and cannot be modified.
 - Only the driver can switched on and off the launch control rev limiter.
 - The non-respect of the above principles makes launch control system illegal.

Andreas Bellu / TCR Technical Director
